STRAWBERRIES

Everbearing Strawberries are now being planted in the home gardens, almost to the exclusion of old style June bearing sorts. After testing out a number of varieties, we have found the genuine Progressives, Americus and Superb to be by far the best. During seasons of ordinary rainfall, it will bear continuously from June to November.

EVERGREENS

All evergreens listed below are two to five times transplanted and are very stocky, heavy trees with the best fibrous root systems. Sufficient space has been provided so that full side development of limbs and extreme heaviness of bodies, in proportion to the height, have resulted.

Specimens

This group includes only selected and balled trees, every tree dug with a ball of dirt and wrapped with burlap to hold same in place, so that the original dirt undisturbed goes with the tree.
